

Doosan Forklift Part

Doosan Forklift Parts - Doosan Infracore Company Ltd. is an international and intercontinental corporation that consists of Defense Industry Products, Industrial Vehicles, Diesel Engines, Automation Systems, Machine Tools and Construction Equipment.

Their United States affiliate, Doosan Infracore America Corporation, operating in Suwanee, Georgia houses a 170,000 square foot production facility, home to a Compact Equipment and Construction division. Cleveland, Ohio houses the Lift Truck division, and West Caldwell, New Jersey has a Machine Tool division. The U.S. headquarters in Georgia facilitates a first rate parts operation capable of supplying an excess of 25,000 line items to support Lift Truck, Compact Equipment, Machine Tool and Construction consumer wishes.

With a association consisting of over 90 independent dealers, the forklift group provides quality materials handling equipment to the wide-ranging North American market. Doosan Infracore America Lift Truck dealers successfully operate in over 220 service and sales locations throughout Canada and the U.S. The lift truck product line impressively features 63 different models consisting of 82 various battery and engine configurations of Electric-powered and Internal Combustion vehicles. Capacities of these numerous vehicle versions vary from 3,000 to 33,000 lbs. All vehicles are designed in an ISO 9001 certified facility.

Doosan Infracore America is the fastest growing forklift and lift truck company in the North American market, thanks to its excellent level of product performance and their consistently high level of buyer support and service given to all Doosan Infracore Lift Truck clients. The U.S. lift Truck division stationed in Cleveland has a skilled team knowledgeable in Product Sales, Purchasing, Marketing, Logistical and Technical Support.

Korea's original home-based lift truck marketplace was an open-import enterprise. In the 1960's, Korea Machinery Co. Ltd. begun to import assembled lift trucks as part of a nationwide equipment expansion venture. Early sales of this manufacturing equipment focused on large business communities, the armed services and on state-run firms. This eventually led to a unification with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division commenced business operations throughout Korea to overhaul and sell this heavy equipment. By 1978, a forklift manufacturing plant was successfully completed. Continuous technical instruction became the new focus for improving quality and product development.

Domestic forklift trade for Daewoo started in 1967 and grew to an amazing 90% market share in Korea. By the 1980's, Daewoo's advanced technological enhancements combined with sales success placed them in a situation of significant expansion of their forklift operations.

Caterpillar Industrial Inc. of the U.S. in 1981, proposed a joint venture project to assist them in the highly competitive North American materials handling market. This project proved highly profitable for Daewoo and their lift truck product sales expanded greatly. In 1984, the company completed development of a new facility to help in manufacturing high end value-added goods for export. In 1993, the company had a international sales system and started exporting designs they had established through in-house expertise, as an independent product. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing growth opportunities into international marketplaces.
