

Meritor Part

Meritor Part - The Meritor Company is a premier global dealer established upon one hundred years of tradition of quality and service. Meritor specializes in integrated systems with several modules and components to the original equipment manufacturers and aftermarket equipment in the transportation and industrial trades.

Meritor values the needs of all their clients to ensure their success while priding itself in the company's unique energy and feels this output of energy to be their competitive advantage in their international operations. Meritor begins with a tradition that values diversity of individuals and their broad thought processes. Operating in 19 countries and employing more than eleven thousand two hundred people, Meritor encourages innovation and collaboration amongst a team of knowledgeable professionals.

By only employing future focused workers, Meritor strongly feels these top-caliber workers will be able to rapidly get used to to changing environments and demonstrate the commitment and performance considered necessary to be able to achieve results in the competitive materials handling business. The company empowers their teams to make sound business decisions so as to enhance the overall success of the company. In return, Meritor provides their employees various possibilities for professional and personal development.

Their Advanced Engineering team is at the forefront of parts and system engineering which comprise drivelines, axles, suspension and braking systems used for medium and heavy duty trucks, buses, military vehicles, trailers and off-highway vehicles. The Meritor Advanced Engineering team is developing. They opened a new technical center in Bangalore, India in September 2009 so as to lead their advanced product development initiatives that represent the whole Asia Pacific region. This team is even responsible for supporting the needs of their worldwide engineering workers.

Meritor's customer focused and dynamic Quality team is dedicated to ensuring optimum processing at their production plants and aftermarket distribution facilities which are situated all around the globe in 19 countries and in 5 different continents.

The supplier development network is particularly located to support new business development. Regional teams are supported by worldwide centralized specialties, initiatives and quality systems in Six Sigma and Materials Engineering. Meritor's growing Six Sigma program promotes a data-driven, fact-based method to decision making in every aspect of the trade. The DFSS or Design for Six Sigma ensures product reliability in every region. The team is also comprised of transactional Green Belts who use Six Sigma tools to business methods and apply lean methods.
